Career Level : Mid Level

Qualification :

## Job Description

---

### Responsibilities:

As a DevOps Engineer, you will:

- Define DevOps strategies for existing and newly created healthcare products;
- Identify and drive opportunities for continual improvement of the cloud infrastructure and services – for example, for resilience, security, performance or cost management;
- Scale existing infrastructure to increase customer demands while being compliant with regulatory and security needs in healthcare;
- Build tools to reduce occurrences of errors and improve customer experience;
- Perform root cause analysis for production errors;
- Design procedures for system troubleshooting and maintenance;
- Ensure healthcare data privacy and security (ISO27001) measures are applied in all workflows;
- Implement a seamless development and deployment process, to ensure a direct impact on the team productivity;
- Collaborate with our development and engineering teams to help design and implement cloud solutions;
- Create an impact on how code is delivered and deployed;
- Establish CI/CD pipelines for internal engineering teams;
- Write maintainable and clean automation code.

### Requirements:

- BSc in Computer Science, Engineering or a relevant field;
- Previous experience as a DevOps Engineer or similar software engineering role;
- Experience with CI/CD systems and deployment strategies;
- Good knowledge of Ruby, Python, or system scripting languages (e.g. bash and family);
- Experience with Infrastructure as Code tools like Terraform, Ansible, Puppet, or AWS CloudFormation;
- Knowledge of USE and RED methods and observability tools like Prometheus, Grafana, Jaeger, and Loki;
- Knowledge of databases and SQL;
- Familiarity with SysOps and troubleshooting skills;
- Problem-solving attitude;
- Team spirit;
- Curious nature, keeping up with the latest trends in design and technology;
- Good verbal & written communication skills in English. You might also have:
- Background working in an agile environment;
- Hands-on experience implementing and managing Kubernetes clusters.

### About the company:

Knok is the answer for a world where everyone has timely access to quality care. Through a Digital Front Door strategy, we connect patients, providers and healthcare professionals in one place.

ISO 27001 certified Recognised as #3 in Deloitte's Technology. Fast 50 2023 Portugal list Proud supplier of the G-cloud 13 Framework. Top 10 Telemedicine Solution Providers in 2021 by Healthcare Tech Outlook.

At Knok, we dare to lead and humanize the digital transformation of healthcare. We envision a world where everyone has timely access to quality healthcare through digital technology, creating a more equal society. We genuinely believe in it and you can recognize it in every person who embraces this mission.

We are rapidly growing, delivering augmented telemedicine on 4 continents, and we have barely begun!
