Job Summary

Vacancy :
Deadline : Jun 16, 2024
Published : May 17, 2024
Employment Status : Full Time
Experience : 3 - 5 Years
Salary : To be defined
Gender : Any
Career Level : Mid Level
Qualification :

Responsibilities:

As a DevOps Engineer, you will:
• Define DevOps strategies for existing and newly created healthcare products;
• Identify and drive opportunities for continual improvement of the cloud infrastructure and services – for example, for resilience, security, performance or cost management;
• Scale existing infrastructure to increase customer demands while being compliant with regulatory and security needs in healthcare;
• Build tools to reduce occurrences of errors and improve customer experience;
• Perform root cause analysis for production errors;
• Design procedures for system troubleshooting and maintenance;
• Ensure healthcare data privacy and security (ISO27001) measures are applied in all workflows;
• Implement a seamless development and deployment process, to ensure a direct impact on the team productivity;
• Collaborate with our development and engineering teams to help design and implement cloud solutions;
• Create an impact on how code is delivered and deployed;
• Establish CI/CD pipelines for internal engineering teams;
• Write maintainable and clean automation code.

Requirements:

• BSc in Computer Science, Engineering or a relevant field;
• Previous experience as a DevOps Engineer or similar software engineering role;
• Experience with CI/CD systems and deployment strategies;
• Good knowledge of Ruby, Python, or system scripting languages (e.g. bash and family);
• Experience with Infrastructure as Code tools like Terraform, Ansible, Puppet, or AWS CloudFormation;
• Knowledge of USE and RED methods and observability tools like Prometheus, Grafana, Jaeger, and Loki;
• Knowledge of databases and SQL;
• Familiarity with SysOps and troubleshooting skills;
• Problem-solving attitude;
• Team spirit;
• Curious nature, keeping up with the latest trends in design and technology;
• Good verbal & written communication skills in English. You might also have:
• Background working in an agile environment;
• Hands-on experience implementing and managing Kubernetes clusters.

About the company:
