Job Description

Responsibilities:

Main Activities:

- **Determine and anticipate resource**, skill, and qualification needs for various service activities according to short- and medium-term forecasts;
- Set action **priorities for operational and support functions**;
- Manage service activities progress according to client schedules, up to the fulfillment of contractual commitments;
- Ensure **timely delivery of technical, commercial, and documentary elements** to the client;
- **Implement and monitor performance indicators** for the service (internal/external);
- Prepare, update, and present client review meetings;
- **Implement and monitor corrective action and continuous improvement plans**, then validate their effectiveness;
- Participate in handling **client consultations and drafting associated technical specifications**;
- Ensure **compliance with operational rules** (QHSE, HR) of the service and guarantee the safety of all involved in your area.

Exercised Responsibilities:

- Ensure client and internal commitments are met;
- Guarantee the **sustainability of services**;
- Manage teams and ensure their development;
- Represent **the company to both teams and clients**.

Requirements:

- Bachelor's degree in **Mechanical Engineering or a similar field**;
- **6+ years of experience as an operations manager** in the industrial field;
- At least **1 year of experience in the Aerospace Industry (mandatory)**;
- Advanced proficiency in Portuguese and English (**mandatory**);
- Intermediate proficiency in French (**nice to have**);
- Experience in **team management**;
- Experience in business management/development;
- Experience in **client relationship management**.

About the company:

Their skills encompass complex machining, production engineering, and aerostructure assembly.

These, combined with their flexibility and market insight, allow them to support **leading European industry players in major projects**, anticipating technological changes and evolving needs.

Their group, comprising multiple entities, offers comprehensive solutions while staying true to their core activities. With **550 highly qualified employees**, they cater to high-tech sectors such as aerospace, automotive, and telecoms, across multiple French sites.

Their technical and human expertise extends their support beyond France's borders.
