Career Level : Mid Level

Qualification :

Job Description

Responsibilities:

- Proficient in **load testing** and **performance analysis**.
- Skilled in **scripting** (e.g., JMeter) and **understanding network** protocols.
- Experience with performance **monitoring tools** and **cloud environments**.
- Ability to **identify and fix** performance bottlenecks.
- Collaborative with suggestions for performance enhancements.
- Proficient in database performance tuning.
- Integrate performance testing in CI/CD pipelines.
- Security-aware during performance testing.

Requirements:

- **Strong QA background** with Azure DevOps and Agile experience.
- Proactive troubleshooting and QA process improvement.
- Expertise in **test case creation and API testing tools**. ISTQB Foundation preferred - it's a plus.
- Excellent communication and meticulous in **test execution**.
- Documenting test plans, cases, and results.
- Continuous learning and industry trend awareness.

Type of profile

The main objective is to integrate an individual who demonstrates technical expertise in executing tests using **Azure DevOps test builds**, solving technical problems and demonstrating a proactive approach with substantial field experience.
