Job Description

Responsibilities

- Roadmap planning: you will be responsible for **planning new features** for the entire platform, including Airport AIs chat channels, our Content Management System and our Natural Language Processing technology leveraging Large Language Models.
- Product communication: you will handle **the communication with clients across the world** regarding the platform, update them about new features, prepare and send them the relevant information and documentation.

Requirements:

- You have an entrepreneurial and problem-solving mindset and hold at least **3 years of relevant product management experience** from previous positions.
- You are a hardworking and very structured person.
- Good **Excel** skills, together with written and oral fluency in **English**, are also required.
- Knowledge of **Portuguese** is preferred.

The company:

Airbot Technology Limited is the worlds leading **customer service platform for the airport industry**. We have developed a software-as-a-service platform **allowing airports to communicate efficiently** with passengers on their websites, mobile applications or 3rd-party messaging applications. We are currently working with more than 80 airports around the world, including Frankfurt, London Gatwick, Lisbon and Sydney airports.
