Job Description

Responsibilities

- Develop high-quality, **scalable solutions under tight deadlines** to meet the needs of our demanding users
- Tackle challenging production issues when they arise, providing expert **3rd level support** to resolve critical problems
- Collaborate closely with business stakeholders and IT teams to gather requirements and ensure alignment with business goals
- Contribute to **software architecture and design decisions**, ensuring our solutions are robust and scalable
- Enhance and maintain a **robust automated test suite**, ensuring high test coverage
- Engage in continuous improvement initiatives, embracing best practices and innovative solution

Requirements:

- Technical Excellence:
Proficiency in building scalable applications with **ASP.NET/C#**. Strong understanding of algorithms, data structures, and API development
- Problem-Solving Prowess: Ability to **tackle complex challenges** with innovative solutions
- Curiosity and Eagerness to Learn: Passion for learning and adapting to new technologies, especially in a fast-paced environment
- Collaboration: Experience working **in agile teams and a strong desire to collaborate** with peers and business stakeholders
- Database Knowledge: Familiarity with both **relational and non-relational database systems**
- Communication Skills: Fluency in **English**, with the ability to communicate complex technical concepts clearly

Nice to have:

- Experience with capital markets
- Experience with position-keeping systems like Sophis
- Familiarity with design thinking techniques and iterative sprints
- Experience with messaging systems integration (e.g. RMQ, Kafka)

The company:

It is a fintech company with a leading marketplace for structured investment solutions.
