Job Description

Responsibilities:

- Develop high-quality, **scalable solutions under tight deadlines** to meet the needs of our demanding users
- Tackle challenging production issues when they arise, providing **expert 3rd level support** to resolve critical problems
- Collaborate closely with business stakeholders and IT teams to gather requirements and ensure alignment with business goals
- Contribute to software architecture and design decisions, ensuring our solutions are robust and scalable
- **Enhance and maintain a robust automated test suite**, ensuring high test coverage
- Engage in continuous improvement initiatives, embracing best practices and innovative solution

Requirements:

- Technical Excellence:
Proficiency in building scalable applications with **ASP.NET/C#**. Strong understanding of algorithms, data structures, and API development
- Problem-Solving Prowess: **Ability to tackle complex challenges** with innovative solutions
- Curiosity and Eagerness to Learn: Passion for learning and adapting to new technologies, especially in a fast-paced environment
- Collaboration: Experience working **in agile teams** and a strong desire to collaborate with peers and business stakeholders
- Database Knowledge: Familiarity with both relational and non-relational database systems
- Communication Skills: **Fluency in English, with the ability to communicate complex technical concepts clearly**

- **Experience with capital markets**

- Experience with position-keeping systems like Sophis
- Familiarity with design thinking techniques and iterative sprints
- Experience with **messaging systems integration** (e.g. RMQ, Kafka)
