Employment Status : Full Time
Experience : 3 - 5 Years
Salary : To be define
Gender : Any
Career Level : Mid Level
Qualification : Bachelor's or Master's degree in Computer Science

# About the role:

TradeBeyond is a leading provider of software solutions for supply chain management and procurement. We help our clients manage their supply chain more efficiently by leveraging cutting-edge technology and best practices. Our platform is built on modern cloud infrastructure, and we are constantly exploring new ways to enhance our offering and stay ahead of the competition.

We are seeking a knowledgeable Technical Consultant with expertise in system design to join our team. In this role, you will play a crucial role in designing and implementing the technical architecture of our platform. You will collaborate closely with the development team and stakeholders to ensure that our platform is built with a robust and efficient system design.

# Responsibilities:

• Collaborate with the development team to **provide guidance and support** throughout the implementation phase, ensuring adherence to the system design principles
• **Develop comprehensive documentation of the system architecture and design**, including diagrams and specifications
• **Work closely with the development team and stakeholders** to understand their requirements and translate them into effective system design solutions
• Work may be involved in any of Tradebeyond's teams - in-house software development or consulting projects
• **Stay up-to-date with industry trends and advancements in system design methodologies** and technologies, incorporating them into our platform when applicable.

# Requirements:

• Bachelor's or Master's degree in Computer Science or a related field.
• **3+ years of experience as a Technical Consultant or similar role**, with a strong emphasis on system design.
• **In-depth knowledge of cloud infrastructure,** especially AWS or Azure.
• Proficiency in designing and implementing RESTful APIs, utilizing Spring Boot (Java), PostgreSQL, MongoDB, ActiveMQ, Elasticsearch, and AWS S3 or Azure Blob.
• **Experience with data replication and streaming techniques**.
• Familiarity with disaster recovery and backup procedures.
• **Strong understanding of security best practices**, including SOC 2 compliance, network security, host security, and application security.
• **Proficiency in utilizing security testing tools such as SAINT exploit tool and vulnerability scanners**.
• **Familiarity with DevOps processes and associated tools**.
• Excellent communication and interpersonal skills, with the ability to collaborate effectively within a team environment.

If you are a skilled Technical Consultant with a passion for system design and a desire to contribute to the development of a reliable, scalable, and secure platform, we encourage you to apply today. Join our team at TradeBeyond and be a key contributor to our success.
